mTELLER

MOBILE BANKING

Capture Your Share of the Mobile Banking Market

Did you know that the number of mobile phone users in the U.S. now reaches well over one hundred million? Likewise, many of these are consumers wanting to access their account information or perform everyday transactions such as funds transfers or loan payments right from their mobile phone or tablet. With its integration to over 35 different data processors, iOS, droid and browser compatibility and a robust feature set, CUtopia's mobile banking solution, **mTELLER**, will get you in on the action.

Whether accessing account balances, remotely depositing checks, or making a loan payment, your members can bank at their leisure whenever and wherever. With **mTELLER**, members can also set up account alerts, access check images and eStatements.

CUtopia's mTELLER delivers robust capabilities that give your members the freedom to conduct their banking anytime, anywhere from their smart phones and tablets.

"We have partnered with CUtopia for over 10 years. Our members find it fast and convenient to have account information in the palm of their hand. The ability to quickly check a balance, pay a bill, or make a transfer makes us technologically competitive while still maintaining a personal relationship with our members."

Susana Williams, CEO, Central Vermont Medical Center Credit Union, Barre, Vermont

Easier to Implement and more Affordable than you Think

With 20 years of experience providing electronic member services to the credit union industry, we leverage our expertise in data integration, project management, implementations, and operations. This expertise results in operational efficiency which means a lower upfront cost and monthly maintenance fee and faster delivery. In fact, mTELLER can be delivered in less than 60 days. During the implementation stage, our staff will provide you with a comprehensive training program; including proper member notification, user access management, and user adoption analytics.

Supporting hundreds of credit unions, our multi-site production environment employs active intrusion detection, high availability disaster recovery replication, and tier 1 data center operation all resulting in 99.999% uptime.

Once mTELLER is released, your assigned Account Manager will routinely contact you to ensure mTELLER is meeting the demands of your members and your credit union is completely satisfied with the support and service after the sale.

If you are looking to implement a mobile banking solution for your credit union for the very first time or you are unsatisfied with your current vendor, let us show you how great life can be in CUtopia.
